

Environmental Policy

MM Electrical Merchandising strives to be an environmentally responsible business by taking steps to minimise the environmental impact of our activities, either directly from our operations or indirectly through our value chain. We believe that a successful future for our business depends on the sustainability of the environments, communities and economies in which we operate, both locally and globally.

MM Electrical Merchandising is committed to:

- Complying with all applicable environmental laws and regulations.
- Seeking more sustainable technologies and processes that enhance the ability to conduct operations in a manner that reduces environmental impacts, when appropriate.
- Working with suppliers to source and supply products with low environmental impact.
- Minimising the generation of wastes from all our activities and operations.
- Maintaining waste management practices that:
 - a) ensure waste is reused, recycled or properly disposed of, and
 - b) identify, control and dispose of products that have special handling and waste treatment needs.
- Monitoring and assessing environmental performance through audit results, corrective action and identifying improvements to standard business practices.
- Strive for continuous improvement in managing our ecological footprint and integrating environmental considerations into our core business activities and business decisions.

Our environmental performance is our responsibility collectively as a business and as individuals.

Colin Lamond
Chief Executive Officer
